PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in operational reporting, dashboard development, data quality, business performance analysis, and database-supported reporting. Combines formal analytical training with practical software engineering experience, enabling strong understanding of how data is collected, structured, transformed, visualized, and used in business systems. Proficient in Excel, Power BI, SQL, Python, Jupyter Notebook, and DAX, with experience translating operational data into dashboards and actionable performance insights.

TECHNICAL SKILLS

Analytics: Excel, Power BI, SQL, Python, Jupyter Notebook, DAX, Data Cleaning, KPI Analysis, Dashboarding, Reporting

Data & Databases: PostgreSQL, MySQL, Supabase, Database Management, Data Integrity, Structured Data Management

Business Reporting: Operational Reporting, Performance Monitoring, CRM Reporting, Sales Analysis, Documentation

Software & Tools: Git, GitHub, VS Code, Power BI Desktop, Microsoft Office, Tableau, Looker, Odoo

PROFESSIONAL EXPERIENCE

Junior Data Analyst | Pax Corporation | June 2022–May 2025 | Remote

- Collected, cleaned, analyzed, and reported operational data to support business reporting and decision-making.
- Built Excel and Power BI dashboards for performance monitoring and management reporting.
- Maintained and updated company databases, supporting data accuracy and integrity.
- Generated recurring reports and supported administrative documentation and operational tracking.

Laboratory Assistant | Hensard University Hospital | June 2025–Present | Toru-Orua, Sagbama LGA, Bayelsa State, Nigeria

- Maintain accurate laboratory records and structured operational documentation.
- Support sample preparation, labeling, testing workflows, reporting, and data tracking in a quality-controlled environment.
- Apply attention to detail and record accuracy to laboratory operations and documentation.

Full-Stack Developer & Founder | ProStackNG Technologies | 2022–Present | Port Harcourt, Rivers State, Nigeria

- Build data-driven software products, dashboards, reporting workflows, APIs, and business systems that turn operational data into usable information.
- Design database structures and reporting workflows across SaaS, marketplace, hospitality, and business-management products.
- Develop AutoReport, a reporting automation product for scheduled branded PDF and Excel report generation.

Manager | Octa Consult | Nov 2020–May 2022 | Rivers State, Nigeria

- Managed daily operations, maintained records, coordinated workflows, and monitored service delivery and quality.

SELECTED PROJECTS

Laboratory Operations Performance Dashboard — Excel

Stack: Excel, KPI reporting

- Designed an interactive dashboard tracking 1,470 samples, with 84% completion and 100% approval figures within the project dataset.
- Monitored sample workflow, turnaround time, test performance, completion, and failure indicators.
- Automated KPI reporting for operational performance monitoring.

CRM Sales Performance Dashboard — Excel

Stack: Excel, CRM reporting

- Analyzed 8,800 opportunities and a \$10M revenue pipeline within the project dataset.
- Tracked sales performance, win rate, client activity, and business-development indicators.
- Built automated reporting to support performance monitoring.

Sales Performance Dashboard — Power BI

Stack: Power BI, DAX, data visualization

- Analyzed \$2.3M revenue and \$286.4K profit within the project dataset.
- Identified 46.9% year-over-year sales growth and 12.5% profit margin.
- Built an executive dashboard for regional performance monitoring and business decision support.

AutoReport — Product build

Stack: Data automation, reporting, PDF/Excel generation

- Building a SaaS workflow that connects data, reusable report templates, automated document generation, and scheduled delivery.

EDUCATION

B.Sc. Biochemistry — Niger Delta University, Wilberforce Island, Nigeria
