

PRECIOUS AMIEKUMO

FULL-STACK SOFTWARE ENGINEER | SOFTWARE PRODUCT BUILDER | FOUNDER | DATA ANALYST

Port Harcourt, Rivers State, Nigeria | preciousamiekumo@gmail.com | +234 704 408 8361

[linkedin.com/in/precious-amiekumo-6a83aa29b](https://www.linkedin.com/in/precious-amiekumo-6a83aa29b) | prostackng.com.ng

PROFESSIONAL SUMMARY

Full-Stack Software Engineer and Founder with 5+ years of hands-on experience building and deploying web applications, native mobile, and desktop applications, SaaS products, APIs, business systems, and developer infrastructure. Experienced across frontend, backend, databases, integrations, cloud deployment, security, payments, automation, and data systems.

Founder of ProStackNG Technologies, building software products across commerce, hospitality, education, business management, marketplace, reporting, developer infrastructure, and digital services. Experienced in taking products from concept through architecture, development, deployment, testing, and ongoing improvement across web, mobile, and desktop environments. Combining data analytics and product thinking, with a strong focus on reliable, secure, maintainable systems.

TECHNICAL SKILLS

Programming Languages: Python, Rust, JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend Development: React, Next.js, Bootstrap 5, Jinja2, Responsive Web Design, Mobile-First Design, Component-Based UI, Cross-Browser Compatibility

Backend Development: Python, Flask, FastAPI, Node.js, Express.js, Rust, REST API Development, API Integration, Webhooks, Authentication, Role-Based Access Control

Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase, SQLAlchemy, Database Design, Database Migrations, Data Management

Mobile & Desktop Application Development: Native Mobile Applications, Android Applications, Desktop Applications, Downloadable Desktop Software, Cross-Platform Product Architecture, Mobile-First Application Design

Cloud & DevOps: Docker, Linux/Ubuntu, VPS Infrastructure, Vercel, Render, Cloudflare, Git, GitHub, GitHub Actions, CI/CD, PM2, Gunicorn, Automated Builds, Deployment Automation, Application Packaging

Payments & Third-Party Integrations: Paystack, Flutterwave, VTpass, Termii, Prembly, Resend, Payment Webhooks, Transactional Email, KYC/Verification APIs

Software Engineering: Multi-Tenant SaaS Architecture, API Design, Rate Limiting, Caching, Audit Logging, Security Controls, CSRF Protection, Data Isolation, Application Performance Optimization, Automation, Monitoring, Observability

Data & Analytics: Microsoft Excel, Power BI, SQL, Python, Jupyter Notebook, DAX, Data Cleaning, KPI Analysis, Dashboard Development, Business Reporting

TECHNICAL SKILLS

Web Applications: SaaS platforms, business management systems, marketplaces, dashboards, REST API-driven applications

Native Mobile Applications: Success Confectioneries, ScholarEdge360, Nestify

Desktop Applications: ClubOps, LodgeIQ, ProStackNG CRM

Infrastructure & Cloud: Application deployment, VPS/Linux infrastructure, Docker, CI/CD, managed databases, Redis, object storage, transactional email, monitoring and observability

PROFESSIONAL EXPERIENCE

Full-Stack Developer & Founder | ProStackNG Technologies | 2022–Present | Port Harcourt, Rivers State, Nigeria

- Design, build, deploy, and maintain software products spanning SaaS, marketplaces, business management, reporting, developer APIs, and infrastructure platforms.
- Architect full-stack applications across React/Next.js and server-rendered frontends, Python/Node.js backends, PostgreSQL/Redis databases, REST APIs, authentication, payments, and third-party integrations.
- Built ClubOps, a multi-tenant business management SaaS with POS, inventory, events, procurement, finance, staff management, security/audit, and subscription billing workflows.
- Developed ProStack Deploy, a unified developer infrastructure platform integrating application deployment, managed databases, object storage, transactional email, security, logs, and metrics; approximately 70% complete and already used for real project deployments.
- Built and tested Nigerian-focused digital products including ProStack API, AutoReport, ProTrackNG, LodgeIQ, MyHarriet, Nestify, Afrinaija, LogiBase, Success Confectioneries, ScholarEdge360, and ProStackNG CRM at different stages of development.
- Implemented production-oriented practices including RBAC, CSRF protection, rate limiting, audit trails, webhook handling, tenant isolation, database migrations, logging, monitoring, and deployment automation.
- Integrate Nigerian payment, identity, messaging, and utility services including Paystack, Flutterwave, VTpass, Termii, and Prembly, Youverify, Google APIs.

Laboratory Assistant | Hensard University Hospital | June 2025–Present | Bayelsa State, Nigeria

- Maintain accurate laboratory records and operational documentation while supporting sample preparation, labeling, testing workflows, and reporting.
- Support structured data tracking, quality-control procedures, equipment cleanliness, and compliance with laboratory standards.

Junior Data Analyst | Pax Corporation | June 2022–May 2025 | Remote

- Collected, cleaned, analyzed, and reported operational data to support business performance monitoring.
- Developed Excel and Power BI dashboards, maintained databases, and generated management reports for decision-making.
- Supported administrative reporting, documentation, and data-quality processes.

Manager | Octa Consult | Nov 2020–May 2022 | Rivers State, Nigeria

- Managed daily business operations, client service delivery, records, workflow scheduling, and quality-control activities.

SELECTED PROJECTS

ProStack Deploy — Active development | ~70% complete

Stack: Docker, Linux/Ubuntu, GitHub, PostgreSQL, Redis, Cloudflare, CI/CD

- Building a developer infrastructure platform designed to unify application deployment and supporting infrastructure services.
- Developing capabilities around GitHub-connected deployment, application hosting, PostgreSQL, Redis, object storage, transactional email, security controls, build logs, and metrics/observability.
- Designed around developer experience, reliability, tenant isolation, cost efficiency, and production readiness.
- Building infrastructure that allows developers to move from source code to deployed applications and supporting services through a unified platform.

ClubOps — Built / testing

Stack: Python, Flask, PostgreSQL, Supabase, Paystack, Bootstrap 5, Resend, Render

- Built a multi-tenant nightclub management SaaS covering POS, inventory, events, procurement, finance, staff management, security/audit, smart tools, and subscription billing.
- Designed tenant-scoped data access to maintain separation between subscriber accounts.
- Implemented role-based access control, audit logging, rate limiting, CSRF protection, payment workflows, webhooks, and transactional email.
- Integrated Paystack subscription billing across multiple pricing tiers.
- Built a downloadable desktop application alongside the web-based platform to support operational use in business environments.
- Implemented advanced operational capabilities including split payments, barcode-based POS workflows, digital drink tokens, loyalty tracking, and anomaly-detection functionality.

ProStack API — Development / sandbox integration testing

Stack: Next.js (Frontend), Rust (Backend), REST APIs, Paystack, VTPass, Termii, Prembly, Youverify

- Building a unified API platform for commonly required Nigerian developer services.
- Architected the platform with a Next.js frontend and Rust backend, providing a modern developer-facing interface over reusable API services.
- Integrating capabilities across payments, SMS, email, KYC/verification, VTU, utility services, webhooks, subscriptions, analytics, and compliance workflows.
- Implemented and tested third-party API integrations using platforms including Paystack, VTPass, Termii, and Prembly.
- Designed the platform around reusable APIs, authentication, developer experience, reliability, and integration consistency.

AutoReport — Product build

Stack: Data automation, reporting, PDF/Excel generation, SaaS workflows

- Building a reporting automation platform that connects data sources to reusable branded report templates.
- Designed workflows for automated PDF and Excel report generation, scheduled reporting, and report delivery.
- Focused on reducing repetitive reporting work and improving consistency of business reports.

ProTrackNG — In development

Stack: Python, PostgreSQL, automation, AI-assisted workflows

- Building a tender intelligence platform for discovering relevant tender opportunities and managing associated documents.
- Developing workflows for opportunity tracking, matching, deadline alerts, document management, and notifications.
- Designed to help businesses organize and automate tender opportunity management.

LodgeIQ — Built / deployed; awaiting meaningful real-user traction

Stack: Hotel management software

- Built a hotel management platform covering front desk operations, reservations, check-in/check-out, housekeeping, restaurant/POS, billing, payments, reporting, analytics, staff roles, notifications, and audit trails.
- Developed a downloadable desktop application to support hotel operations alongside the web platform.
- Designed the platform around the operational requirements of hospitality businesses.

MyHarriet — Product development

Stack: Marketplace, escrow, Paystack, Flutterwave, KYC/NIN verification, webhooks

- Designed a Nigerian marketplace platform focused on secure buyer-seller transactions.
- Developed workflows around escrow, vendor verification, secure payments, dispute management, automatic release, and marketplace operations.
- Integrated payment and verification workflows using Nigerian financial and identity-service providers.

Nestify — Built / deployed; awaiting meaningful real-user traction

Stack: web and native application for house renting and airbnb sales

- Building a direct landlord-to-tenant rental marketplace designed for the Nigerian property market.
- Developed web and native mobile application experiences supporting property discovery, search and filtering, landlord verification, communication, subscriptions, payments, and listing analytics.
- Designed the product around direct interaction between verified landlords and prospective tenants.

Scholaredge360 — Built / deployed; awaiting meaningful real-user traction

Stack: digital academic-support platform

- Built a digital academic-support platform serving Nigerian university students across project, assignment, seminar, CV, and academic-support workflows.
- Developed both web and native mobile application experiences.
- Designed application workflows around Nigerian university requirements, departmental formats, and student service delivery.

Success Confectioneries — Built / deployed; awaiting meaningful real-user traction

Stack: digital ordering and breakfast-product delivery

- Built a native mobile application supporting digital ordering and breakfast-product delivery workflows.
- Implemented customer-facing functionality around product selection, order placement, and delivery operations.
- Integrated phone-number verification and supporting backend services for the application.

ProStackNG CRM — In development

Stack: business management and CRM platform

- Building a business management and CRM platform designed around the operational requirements of Nigerian businesses.
- Developed web-based business management workflows alongside a downloadable desktop application.
- Focused on structured business data, customer management, operational workflows, reporting, and administrative functionality.

CI/CD & APPLICATION DELIVERY

- GitHub Actions
- Automated application builds
- CI/CD pipelines
- Desktop application packaging and release workflows
- Deployment automation
- Git/GitHub version control
- Docker-based deployment
- Linux/Ubuntu server environments
- VPS deployment
- Cloud application deployment
- Application monitoring and logging

EDUCATION

Bachelor of Science (B.Sc.) — Biochemistry

Niger Delta University

Wilberforce Island, Nigeria

CERTIFICATIONS

- Full Stack Programming Course — 2021
- Google Data Analytics Professional Certificate — 2022
- Data Analytics Bootcamp — 2022
- Effective Problem Solving and Decision Making — 2023
- Communication in the 21st Century Workplace — 2023

CORE COMPETENCIES

Full-Stack Software Engineering | Software Architecture | SaaS Development | Web Application Development | Native Mobile Applications | Desktop Applications | Backend Development | Frontend Development | REST API Development | API Integration | Database Design | PostgreSQL | Cloud Deployment | DevOps | CI/CD | GitHub Actions | Docker | Linux | Multi-Tenant Architecture | Payment Integration | Authentication | RBAC | Security Engineering | Automation | Application Performance | Monitoring & Observability | Technical Problem Solving | Data Analytics | Business Intelligence
